

RECORD FIRE SCORECARD

For use of this form see, FM 3-22.9; proponent agency is TRADOC

DATA REQUIRED BY PRIVACY ACT OF 1974

AUTHORITY: 10 USC 3012(g)/Executive Order 9397.
PRINCIPAL PURPOSE(S): Facilitates individual's transition to distant target and provides feedback.
ROUTINE USE(S): Evaluate individual proficiency: SSN is used for positive identification purpose only.
DISCLOSURE: Voluntary. Individuals not providing information cannot be rated/scored on mass basis.

Conduct of Record Fire Range

The Record Fire Course provides for the engagement of one 20-round exercise, and two 10-round exercises. Twenty single or multiple targets are engaged from the prone supported or foxhole supported firing position; 10 targets are engaged from the prone unsupported position; and 10 targets are engaged from the kneeling position. Once firing begins, no cross-loading of ammunition is allowed. The uniform for qualification is helmet, LBE/LBV, and Interceptor body armor with both SAPI plates; one in front, one in back. No other armor is required.

(1). Table 1

Prone Supported Firing Position (or at the unit commander's discretion) **Foxhole Supported Firing Position.** The firer is given one 20-round magazine to engage 20 targets at various ranges.

(2). Table 2

Prone Unsupported Firing Position. The firer is given one 10-round magazine to engage 10 targets at various ranges.

(3). Table 3

Kneeling Unsupported Firing Position. The firer is given one 10-round magazine to engage 10 targets at various ranges.

(A). Credit for target hits should not be given when rounds are "saved" from difficult targets for use on easier targets. (Example: not firing at the 300-meter target so an additional round can be fired at the 150-meter target.) When double targets are exposed, the soldier should fire two rounds. If the first target is missed, he may fire at that same target with the second round.

(B). Engage the target that poses the greatest threat first (normally assumed to be the closer target). No scoring distinction is made between near and far targets or the sequence in which they are engaged. Credit is not given if unused ammunition from one 20-round table is added to a magazine provided for the next table.

(C). Soldiers who fail to qualify on the first attempt should be given appropriate remedial training and allowed to re-fire in a few days. When a soldier re-fires the course, he remains unqualified with a score of 22 target hits or less. A rating of marksman is awarded for a score of 23 to 40 target hits. When automated scoring procedures are available that allow the performance of the soldier to be stored and retrieved before a weapon malfunction, his performance is added to the score of his first attempt after weapon repair and re-fire. If a soldier's weapon becomes inoperable and his performance before a malfunction precludes qualification, he is considered unqualified and must re-fire.

(D). Alibi firing is reserved for soldiers who encounter a malfunctioning target, ammunition, or rifle. A soldier will not be issued more than 20 rounds for Table 1, 10 rounds for Table 2, or 10 rounds for Table 3. Soldiers who fire 20 rounds despite a target malfunction will not be issued additional alibi rounds. There are no alibis for soldier-induced weapon malfunctions or for targets missed during application of immediate action. These procedures must be strictly adhered to when a malfunction occurs.
